

ITVR Fact Sheet

The Industry's Most Innovative Multi-Country TV Audience Analytics Platform

Overview

A web-based, multi-country TV audience analytics platform combining TAM data with cross-market identification and global research, ITVR services program-level data in over 70 markets across the Americas, Europe, Asia Pacific and Africa from Kantar, Nielsen, BARB, Ibope, Numeris, OzTam, Barlovento, MMS, Eurodata and other local data providers. Our subscription-driven service adds value to your audience data investment by delivering enhanced meta-data analysis to optimize your research, marketing, business development and sales operations.

Highlights

CUSTOMIZABLE
A turnkey research solution featuring over 20 active reporting templates with easy-to-use criteria selection and customizable features like Product, Channel and Demographic Groups for simplified and standardized reporting throughout the system.

USER FRIENDLY
Designed with an intuitive interface and easy-to-use features like Smart Text prompting, multiple-level filters, automatic refresh and data identification Progress Dashboard, ITVR reports are viewed in HTML and exportable to Excel®.

STANDARDIZATION
Transforms raw TAM data into useable information. A program classification system ensures standardized analysis of data from multiple sources for multi-country research from a single platform instead of various local market systems.

IDENTIFICATION
Subscription includes extensive market translation services and research support, with behind-the-scenes identification and tagging of millions of foreign-language telecasts to the product database which includes meta-data coding.

ANALYSIS
Optimizes research efforts with automatic calculations, including program rankings, percentage changes over lead-in/out, time slot benchmarks, distributor breakdowns and instant graphs.

PORTABLE
ITVR is a web-based application accessible from anywhere in the world. With just an internet connection and a web-browser, you can view Program Rankings, Time Period Competition and Distributor performance within minutes.

AFFORDABLE
Competitively priced, ITVR combines software and program identification into a single service. With a fully hosted product database, free support, upgrades and maintenance, no installation or infrastructure investment is required.

System Features
